6. Remarks and Other Relevant Information:

Jim Gollaher plans to drill four ground water wells, three of these wells will be utilized for irrigation of land under WRC136626. The present irrigation diversion is from a surface water diversion on the Entiat River into the Gaines Ditch, which will be converted to the designated groundwater wells located above the Ordinary High Water Line near the Entiat River on the Gollaher property. The Gollaher Point of Diversion change and well construction project will eliminate impacts due to the annual maintenance of the current surface water diversion and by installing new wells for irrigation this project will decrease the direct withdrawal of surface water and decrease impacts on the Entiat River. All three wells will be metered allowing the irrigator to gauge and report use.

The improvements to this irrigation system is within the Lower Entiat River Assessment Unit (RM 0.0-16.2) of the Entiat subbasin. ESA listed salmonids utilize the mainstem Entiat River within the Lower assessment unit, including endangered Upper Columbia River spring Chinook (*Oncorhynchus tshawytscha*), as well as endangered steelhead (*Oncorhynchus mykiss*) and threatened bull trout (*Salvelinus confluentus*). Non-listed salmonids such as summer Chinook and Coho, and resident cutthroat trout are also found within the project area

This project addresses limiting factors and implements actions recommended in the Entiat WRIA 46 Watershed Management Plan approved in 2004, the Entiat Subbasin Plan, and the Upper Columbia Salmon Recovery Plan. Therefore, we request expedited processing under WAC 173-152-050(2)(b) and (3)(a).
